

SUDIPTA NANDY

SENIOR AUTOMATION ENGINEER

 sudipta.nandy0931@gmail.com

 8984281065

 Kolkata, WB 700034

 <https://www.linkedin.com/in/sudipta-nandy-35327a17>

PROFESSIONAL SUMMARY

Professional in automation engineering with focus on innovation and quality. Extensive experience in developing automated systems that drive productivity and reliability. Known for strong team collaboration skills and adaptability to changing project requirements. Expertise in scripting, process optimization, and system integration.

TECHNICAL PROFILE

Software functional testing

Scaled-agile framework environment (SAFe)

Version control

Cross-functional teamwork

Eclipse and Visual studio IDE

SKILLS

Scripting languages: Python

Miscellaneous: OOPs, SDLC, Git, ALM, pycharm, roundcube, SOAPUI, Papyrus

Frameworks: Selenium, robot framework

Database: MySQL, MongoDB

Defect Reporting Tool: Jira, Miro

EDUCATION

KIIT University

Bhubaneswar, India • 04/2018

Bachelor in Technology:

Information Technology

CERTIFICATES

ISTQB Certified Tester Foundation level (CTFL) Completed the ISTQB

WORK HISTORY

Ericsson - Senior Automation Engineer

Kolkata, India • 09/2025 - Current

- Leading the switch to Playwright to make our testing faster, and more stable. I'm focusing on 'auto-waiting' to stop tests from failing randomly, and 'parallel testing' to cut down the total time it takes to get results.
- Using AI tools like **Amazon Q** and **Kiro CLI** to help the team rewrite old, outdated code, and generate new scripts much faster. This allows us to spend less time on manual cleanup, and more time on high-priority features.
- Developed AI agents that scan the application to verify feature coverage and suggest new test cases. We focused on building comprehensive, positive, and negative scenarios for functional testing.

Capgemini - Consultant

Bengaluru, India • 02/2022 - 09/2025

- Acted as the lead automation consultant in a **Scrum of Scrums** environment, bridging the gap between multiple global teams to keep testing on track and synchronized.
- Designed the end-to-end test strategy, creating a clear roadmap for how the software is tested, how bugs are reported, and how we update stakeholders on project health.
- Developed high-performance API and UI automation components using **Python and Robot Framework**, allowing the team to test more features automatically, and reduce manual effort.
- Led the onboarding and task allocation for junior engineers, serving as a dedicated mentor to bridge skill gaps. I personally coached team members through project interviews and initial assessments, ensuring they were fully prepared to meet client expectations and technical standards.
- Served as a location lead for the business unit's event team, where we directed end-to-end planning and hosting of major

foundation level certification in July,2021.

L0 Architect Certification Completed
level zero architect certification in March 2024.

corporate initiatives to drive team collaboration and office culture.

Ericsson - Test Engineer

Kolkata, India • 10/2018 - 02/2022

- Maintained up-to-date documentation of all test plans, procedures, results, and defect tracking databases for future reference or audits.
- Created comprehensive test plans, test scripts, and use cases to support testing objectives.
- Developed customer-centric Python tools (Pandas, Paramiko) to automate deployments and system validations in live production environments.
- Built a custom test acceptance framework using Selenium and Robot Framework that was officially adopted as a core, formal asset for a major U.S.-based client.

Techment Technology - Intern

Bhilai, India • 05/2018 - 08/2018

- Generating test scenarios, executing test cases, and collecting test data for a software application.
- Executing test batches and analyzing the test results to report the defects.
- Creation of test documentation, including test summary reports, test execution reports, test procedures, and bug reports.
- Conducted usability tests, created user flows, and wireframes, and documented usability standards.
